--BACKGROUND OF THE INVENTION--;

--1. Field of the Invention--;

Page 1, first full paragraph:

--The invention concerns a motor vehicle with opening roof sections ~~in accordance with the introductory clause of Claim 1.~~

Page 1, after the first paragraph, insert

--2. Description of the Related Art--;

Page 2, before second full paragraph, insert:

--SUMMARY OF THE INVENTION--

Page 2, third full paragraph:

--The invention achieves this objective with a motor vehicle with an automobile body, which includes rigid automobile body regions located on both sides above side window regions,

wherein, in a closed roof position, at least two panel-shaped roof sections lie one after the other between the two rigid automobile body regions and can be moved out of the closed position into an open position further below in the automobile body, characterized by the fact that, from the closed position of the roof sections, at least a front roof section can be moved over the roof section that is located behind it by guiding it laterally in the manner of a sliding sunroof; that the front end regions of the roof sections can be raised from this position, and the roof sections, with their front ends raised, can be lowered into the automobile body; and that, in the closed position of the roof sections, a rear window, which can be separately moved between an open position and a closed position, borders directly on the rear roof section ~~the features of Claim 1. Additional advantageous embodiments of the invention are disclosed in dependent Claims 2 to 10.--~~
